

CP1 Compact

Level 1 Chest Protection

Mitigate Fear. Prevent Injury.

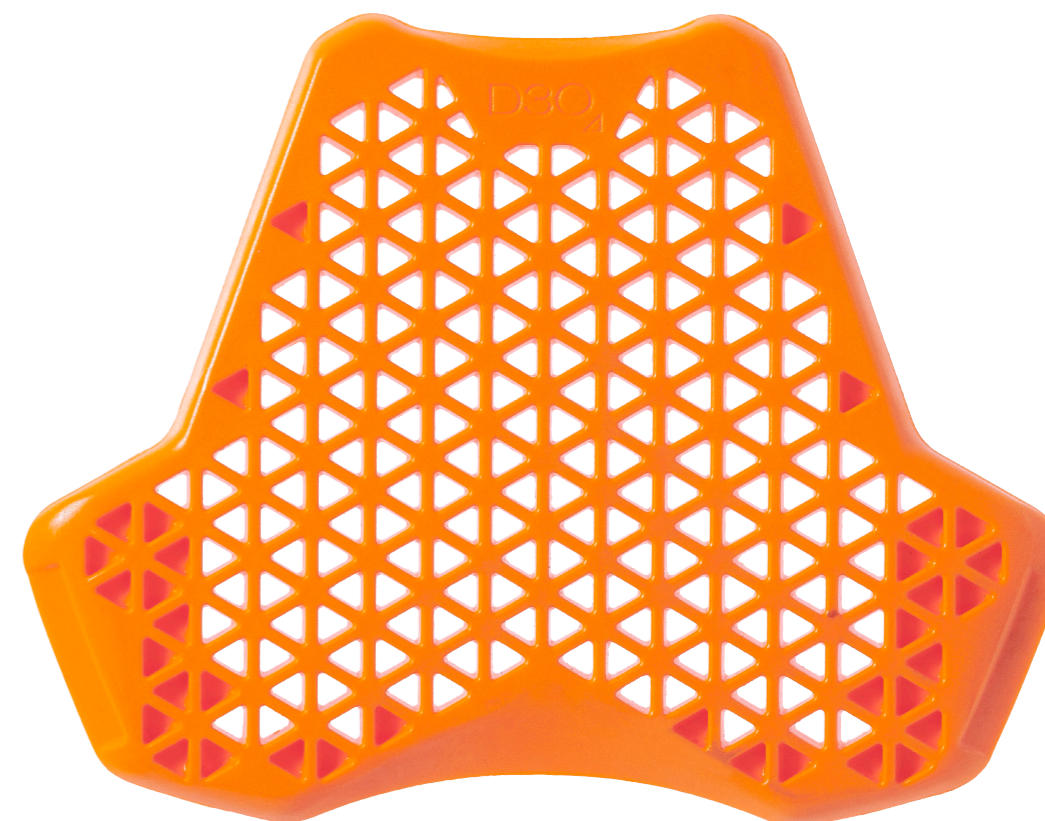

D3O's dilatant materials are designed to absorb and dissipate energy in response to blunt force impact.

The D3O® CP1 Compact L1 chest protector features a low-profile, optimised material and TriVent geometry combination to provide maximum ventilation and protection for the 2-wheel market. Its winged, tapered design offers additional rib protection and discreet integration into jackets.

The CP1 Compact is ideal for those wanting a smaller pad due to smaller chest size or the need for increased freedom of movement.

Product Features

- D3O® patented technology
- Certified to exceed the performance requirements of
